What's new in Ancient Huntsmen:

Review I must admit, as I'm writing this review, I'm not sure how I feel about a lot of things. The idea of writing about a film I'd have to actually pay money to see and pay extra attention to without having already seen it, and being disappointed, is a bit of a tough row to hoe. On one hand, there's a parallel with sports writing: you watch a sport; your interest fades by halftime (not total extinction, thankfully) and when the game ends, you remember only the highlights and fail to take it in. Without a doubt, I'm much more disappointed with the soundtrack of such an under-budgeted film than I am the film itself. Hearing the first Viola By Night album had me convinced for a long time that I would love to hear more Phil Larson. Hearing this soundtrack changed my perspective, but in such a way that was difficult for me to come to grips with. And yet, here I am, writing more about a soundtrack that at first I ignored (if you listen closely, tracks one, five, and twenty-two sound less memorable and prominent than the others) and trying to be completely open-minded about it. It's a hard thing to do. So to start, I'm going to admit how I feel about listening to soundtracks. If a soundtrack doesn't suit your style and don't play a large enough role in the story, it's okay to find some merit in it, but be prepared to lose an ounce of enthusiasm while listening. That being said, the first time I experienced a lot of the instruments and textural varieties here is in the very last song of the film, "Orpheus: Fall For Eurydice." Orpheus' classic moments are perfectly illustrated here, an appropriate mood invoked by the sadly beautiful arrangement. Warm up to it, and the track starts to feel more like an indie movie than your typical Euraydice-willing film. The opening chords ("Fall For Eurydice" composed by Phil Larson) linger for a couple of seconds before the very actual plaintive melodies delve into, and then back out of the note you are left with an empty space beneath your feet with the sudden suspension of everything. The track builds to an crescendo, and the way the percussion and strings play along with the more melodic instruments reminds of why Phil Larson is

such a fantastic composer. And why his compositions for video games and music for movies have been so popular. The
